Key skills:

- Professional simultaneous interpretation RU <> ENG (since 2008).

Fields: Sports, Business & Economics, General. Other topics can be considered with sufficient preparation materials available in advance.

My strengths as an interpreter: I'm equally comfortable to interpret into Russian and English as I have near native fluency in modern English (I received BBA and MBA from the institution with English as medium of instruction). I speak neutral English (close to US English). Having spent considerable time in a very diverse South East Asian region I can easily understand different accents and dialects of English.
